September 2022

### Opportunity to Construct Conveyance and Pump Facilities as Part of the Ship Canal Water Quality Project

In early 2023, the City of Seattle's Ship Canal Water Quality Project (SCWQP) will be looking for a contractor to construct conveyance and pump station facilities in the Ballard neighborhood. The facilities will connect to the new storage tunnel.

#### Work Included in the Contract

This project consists of the following elements of work:

- Construction of the Tunnel Effluent Pump Station (TEPS), Facility Building, and associated site and right-of-way improvements at and adjacent to the TEPS Site
- Construction of roughly 2,200 LF of conveyance piping to include 1,900 linear feet of 60" diameter fiber reinforced polymer pipe installed using microtunneling, a diversion structure, maintenance shafts (holes), and associated site and right-of-way improvements at the Ballard Conveyance Site
- Modifications of flow diversion structures to allow flow into the storage tunnel at the East Ballard, Fremont, Queen Anne, and Wallingford project sites

#### Community Workforce Agreement and Priority Hire

This project is a Covered Project subject to the City of Seattle's Community Workforce Agreement and Priority Hire (Seattle Municipal Code 20.37). Priority Hire provides access to work on the City's construction projects for women, people of color, and people living in economically distressed communities. For more information on Priority Hire, visit the City's website at [www.seattle.gov/purchasing-and-contracting/priority-hire](http://www.seattle.gov/purchasing-and-contracting/priority-hire).

#### Estimate and Advertisement Timing

The Engineer's Estimate for this project is \$102M. The advertisement for bids is expected in Q1 2023. Bid advertisement will be posted to [seattle.procurement.com/](http://seattle.procurement.com/).
